Work Experience

Product Designer III, Peloton Music

Aug '23 - May '26

Led a full redesign of Crescendo and Maestro, the two internal apps instructors and production staff use to build and film 1,000+ Peloton classes a month.

Built a custom design system light enough for one designer to own, enabling shared code across both apps and moving from annual to monthly builds.

Integrated music recommendations that steers instructors towards music that better utilizes our licensing deals, cutting \$4M+ per year in royalty costs.

Replaced manual checks and email-based corrections with in-app validation, returning 30+ days a year to instructors and the production team.

Coupled in-app feedback with instructor shadowing sessions, establishing a continuous feedback loop that made users active participants in the product.

Product Designer I & II, Peloton Music

Oct '20 - Aug '23

Started as the first designer on a web app that manages all our music & class data.

Created & maintained a design system that streamlined our design and front-end development process while simultaneously working on dozens of new features that made the lives of our music and production teams easier.

Product Designer, Squid Notes

June - Dec '19

Created a "North Star" redesign for the core notes editor to make note-taking a more natural & fluid process. Squid is the #1 Android app for handwritten notes.

UX Design Intern, Ebay

June - Sep '18

Worked on Ebay's new design system. I conducted research, built components, & created documentation for 2 different patterns related to search and filtering.

Visual Designer, Zoomforth

Feb - Dec '17

I helped customers design Zoomforth web pages and provided styling help.

UI Engineering Intern, Ellie Mae

June - Sep '17

Built a tool to help the UX team share design patterns with engineering.

UI/UX Design & Developer Intern, Jupyter

Mar - Dec '16

Designed and developed multiple new features for JupyterLab, a web based IDE.

Education

California Polytechnic State, San Luis Obispo

Sep '15 - Dec '19

Software Engineering B.S. concentrating in Human Computer Interaction

What Im Great At
